

You as a beta tester are being trusted not to sell or redistribute these actions in anyway. It's just bad karma to do that kind of stuff !!! If any of your friends want to get a copy of this free beta version please direct them to the sign in page at www.getproactions.com

Thanks,
Steve DePino Ph.G (Photoshop Guru)

Step 1

Installing PRO ACTIONS (beta)

- 1) Close Photoshop Program
- 2) Find and select your Photoshop program folder
- 3) Select the "Presets" Folder
- 4) Select the "Photoshop Actions" folder
- 5) Copy and past all PRO ACTIONS (.atn) files to this Location

Step 2

Loading PRO ACTIONS (beta)

- 1) Open Photoshop Program
- 2) Open Action Palette Window > Actions
- 3) From Action palette click the little arrow in the upper right hand corner to relieve the drop down menu.
- 4) In that drop down menu select the PRO ACTIONS (beta) sets to load them into your main menu.

Step 3

Playing PRO ACTIONS (beta)

Once your actions are loaded

- 1) Open a image file you would like to work with in Photoshop.
- 2) Open your PRO ACTIONS (beta) set now in your main menu and find the action you would like to run.
- 3) Press the "Play" button at the bottom of the Actions palette window.

Helpful Hint-

Most "Solution" actions in the PRO ACTION (beta) set have a built in history snapshot so that you can easily reverse any image back to it's original form by just clicking the snapshot in the history pallet.
